

Jake Lunde

jakelunde@me.com · lunde.co · Seattle, WA

Product designer who ships production code. Ten years in consumer products, most recently teaching kids to invest at Greenlight, and before that putting a cruise ship in a guest's pocket at Disney. This PDF came off a dot-matrix printer I built at lunde.co.

EXPERIENCE

Staff Product Designer (promoted from Design Lead)

Oct 2023 – Present

Greenlight · Seattle, WA

- Led design on Invest, Greenlight's investing product for kids and families. Customers exposed to the redesigned experience made a first trade at 3–4× the rate of those who weren't, and detail-page views rose 355%.
- Shipped production SwiftUI: a press-and-hold performance graph that scrubs across time horizons with a haptic detent per segment. Engineering had scoped the interaction as too expensive to build, so I prototyped it in the real repo. Most of that code shipped, giving the app its first haptics.
- Turned the research finding into the product's spine. Kids could read the redesigned financials but still couldn't say what a company actually did: "just numbers on a screen." That gap became Analyze, a guided decision framework, plus AI-generated company overviews spanning the S&P 500.
- Designed the Economic Moat component, a concentric-ring competitive model ranked from filings data, and built AI workflows into the team's day-to-day product development process.

Senior Product Designer

Aug 2021 – Oct 2023

Disney Parks, Experiences and Products · Los Angeles, CA (Remote)

- Owned product design and creative strategy for the Disney Cruise Line Navigator app, the onboard companion guests use to plan every day of a sailing.
- Built and maintained the design system for Disney Cruise Line's digital products, and drove the organization's Sketch to Figma migration, including running training sessions for executives and partner teams.
- Ran the full research loop (session guides, testing, synthesis) and presented strategy and new solutions up to VP level.

Senior User Experience Designer

Oct 2018 – Aug 2021

Blink UX · Seattle, WA

- Strategy and interaction design on 2–6 month engagements for Google, Amazon, Microsoft, Dell, eBay, Oculus, and REI.
- Specialized in complex enterprise problems across platforms and devices: stakeholder alignment, research synthesis into process and experience maps, prototypes for usability testing, and full design-system documentation.

SKILLS

Design	Product design · Design systems · Interaction design · Prototyping · Design research · Accessibility (WCAG 2.2 AA)
Code	TypeScript · React · Next.js · CSS · SwiftUI
Tools	Figma · Claude Code · Cursor · Storybook · Motion

EDUCATION

Central Washington University

Bachelor of Fine Arts, Graphic Design

2014

Also: competent bike mechanic, better baker, and staff to a dog with a larger following than mine.
